Manufacturing

Being the largest garments exporters in Delhi NCR, Panorama Exports has equipped the garments division with automatic laser cutting machines, sewing machines. For accurate and intricate cutting jobs along with small radius cuts and patterns, the facility has latest Westema Band Knife machines, Eastman straight knife machines and digital plotting machines. Spread across two units, the sewing division at Panorama Exports has an installed base of more than 1500 high tech sewing machines from Juki, Pegasus and Brother.it is a setup that results in durable, beautiful seams and finishes across the garments range.

Washing, Finishing Packing

The garments division also boasts of contemporary facilities for garment finishing including automatic washers, tumbler dryers, conditioning chambers, presses, needle detectors and specialty finishing & packing machines. All the products are checked for consistency in quality across all the stages by the final inspection department.

Our Competence

Quality is the very principle that drives the organization. This is achieved by infusing stringent checking and validation processes across the entire manufacturing mechanism. An efficient ERP (VG) & “Stitch well” system lends professional competence to the company's affairs making it the manufacturer in India.

Panorama manufacturing setup is a three vertically integrated production units spread over a sprawling 124000 sq.ft. of area. It has combined best in class infrastructure by sourcing contemporary machinery in garmenting, and finishing from reputed manufacturers across the world.

Future Plans

Motivated by the success of its products and the trust Panorama enjoys with its customers has instigated key development plans for the future. The company aims to evolve as a one stop solution provider in garments manufacturing.

Our future expansion plans are designed to achieve several key objectives:

Increased Production Capacity: To meet growing demand, we aim to expand our manufacturing capabilities significantly. This includes investing in state-of-the-art machinery and technology to streamline production processes and boost efficiency.

Diversified Product Range: We plan to diversify our product range to cater to a broader customer base. This may involve expanding into new categories, such as activewear, athleisure, sustainable fashion, or specialized niche markets.

Global Market Reach: Expanding our international presence is a priority. We will explore opportunities to establish partnerships, distribution channels, or manufacturing facilities in key global markets, leveraging our expertise and reputation.

Sustainability Initiatives: As sustainability becomes increasingly important to consumers, we will invest in eco-friendly production methods, materials, and supply chains. Our expansion will prioritize sustainable practices and environmentally responsible products.

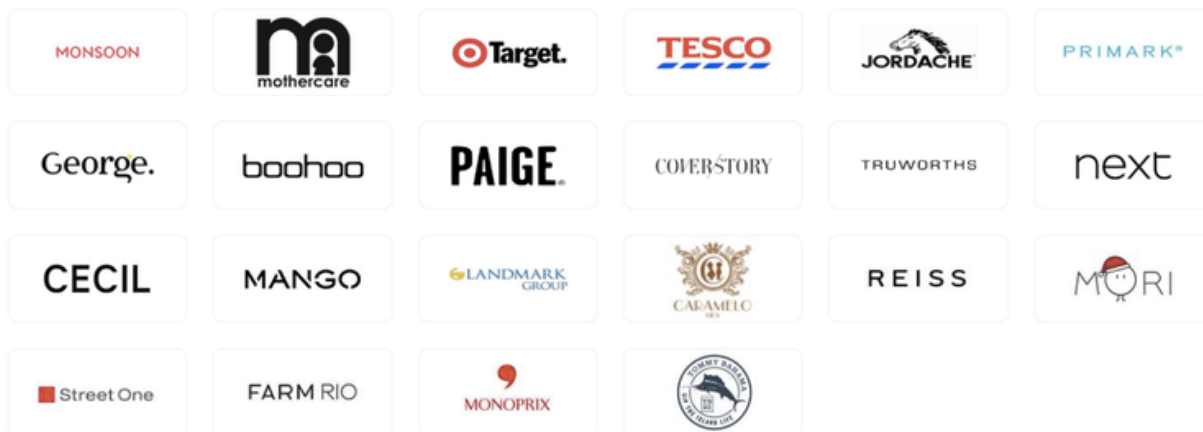

Digital Transformation: Embracing Industry 4.0 technologies, we plan to digitize our operations, from design and prototyping to inventory management and customer engagement. This will enhance our agility and responsiveness.

Clients

Panorama's products traverse across the globe owing to the trust it is entitled with by its esteemed clients.

Today, Panorama Exports supplies to the leaders in the garments and fashion industry and is only growing by the day to serve global players.

Environmental Sustainability

Panorama Exports practice operating a business without impacting the environment negatively. Our goal is to be operating as a complete green business in the best interests of the global environment, supporting communities and economy's dependent on a healthy planet. Cutting emissions, lowering energy usage, sourcing products from fair-trade organisations and ensuring their physical waste is disposed of properly with the smallest of carbon footprints are some of our practices towards contributing to a safe and healthy environment.

Warehouse Inauguration

Introducing Panorama Export's Innovative Fabric Storage Warehouse

Panorama Export, a leading player in the textile industry, is proud to unveil its newest venture: a state-of-the-art fabric storage warehouse. Designed to revolutionize the way textiles are stored and managed, this innovative facility sets a new standard for efficiency, organization, and preservation.

Key Features:

Cutting-Edge Technology: Panorama Export's fabric storage warehouse is equipped with cutting-edge technology that ensures optimal conditions for fabric preservation. Advanced climate control systems maintain ideal temperature and humidity levels, safeguarding the quality of the stored textiles.

Automated Inventory Management: Say goodbye to manual inventory tracking! The warehouse incorporates automated systems that streamline the storage and retrieval of fabrics. Using barcode scanning and RFID technology, Panorama Export can efficiently monitor and manage the inventory, reducing the risk of errors and enhancing operational efficiency.
